***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on Dec 19, 2006 has been entered.

Claims filed Feb 5, 2007 have been entered.

***Specification***

The disclosure is objected to because of the following informalities: on page 10, paragraph 61, line 7, "stand member 6", apparently should be - - stand member 7 - -.

Appropriate correction is required.

***Claim Objections***

Claim 6, line 3, "5a" should be - - a - -.

In claims 22 and 23, the deletion and addition of markups for "the" and "a" was not necessary since the original claims were already amended,

***Claim Rejections - 35 USC § 112***

Claims 1,4-23, 26-39 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant states that the limitation of the control unit being moveably connected to the base hinge is supported by the disclosure of Figs 4 and 6. However, the specification is silent regarding this limitation. Applicant would have to amend the specification to clear recite the subject matter of the limitation, and how it is illustrated in the drawings.

Claims 22 and 23 recite a stand member supporting a monitor body, and a stand member placed between the monitor body and the base member. The specification recites only one stand member (7), the one placed between the monitor and the base. Which is the other stand member?, the one supporting the monitor main body.

Claims 4-8, and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 lacks antecedent for “the first and second rotation preventing parts.

Claim 5 lacks antecedent for “the operating lever”.
